FABRICATION SERVICES

ABOUT **DULSCO** GROUP

Homegrown in the UAE, DulSCO Group is a leader in the provision of Environmental Solutions, People Solutions, Talent Solutions and Energy Recruitment Solutions, that supports growth, bolsters commerce and creates a more sustainable way of life. What began as a simple stevedoring operation on the banks of the Arabian Sea in 1935 has today grown into a multifaceted enterprise serving public and private sectors across the Middle East and the world. The industries and organisations we partner with are many, but at DulSCO Group, we have a singular ambition – to power better communities.

DULSCO FABRICATION SERVICES

The Fabrication Unit is one of the best equipped and highly skilled workshops in Ras Al Khor, Dubai.

A specialised team is available 24/7 to carry out customized orders, handling all stages of a job, from fabrication

to installation and after sales support.

There are no limits to the shapes and designs of the fabricated products, and the customer's requirements dictate the choice of material.

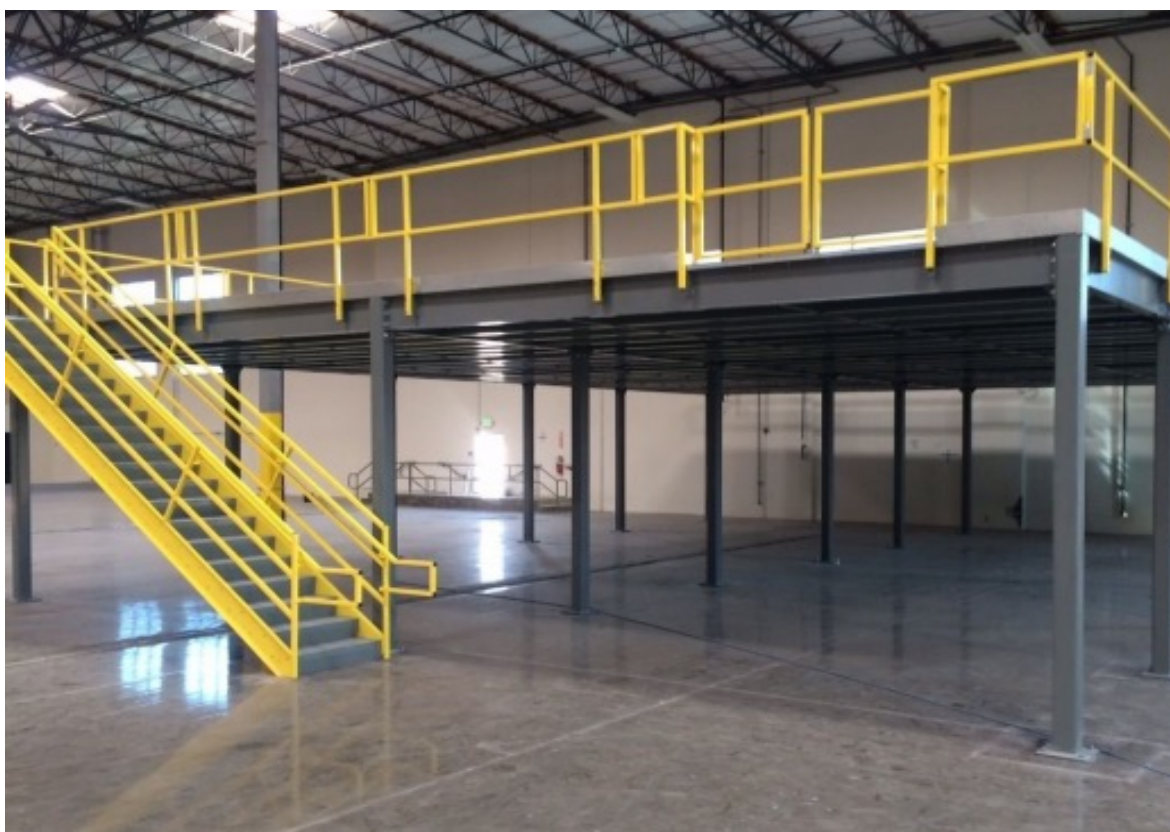

SERVICES

Customer satisfaction is our number one priority, and for any service we provide, our team conducts multiple quality control checks to guarantee an outstanding and elegant presentation.

By working closely with our clients, we have established over time exceptional relationships and have gained trust within the market by providing top-notch services with the highest standards.

- » **Skips and other waste handling equipment**
- » **Fabrication of road tankers and leak repairs**
- » **Box truck solutions**
- » **Storage tanks**
- » **Reinforcement of old vehicles and equipment**

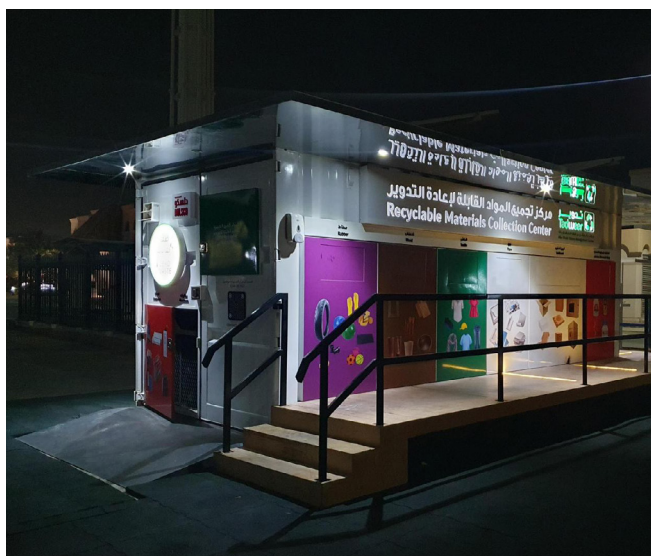

PROJECT HIGHLIGHTS

At Dulsco Workshop, we have embarked on several impressive endeavors in the UAE. We are delighted to share some of these remarkable projects to showcase our commitment to excellence and innovation.

1 | Recyclable Materials Collection Center

Old cargo containers turned into unconventional recyclables collection centers. The containers have been brought back to life, totally customized, equipped with solar panels, and host solar powered mobile charging stations. The eye-catching design, displaying illustrations about the importance of the 4 Rs – reduce, reuse, repurpose, recycle – is a big success in Abu Dhabi residential communities.

2 | Expo 2020 Dubai Three Stream Waste Bin

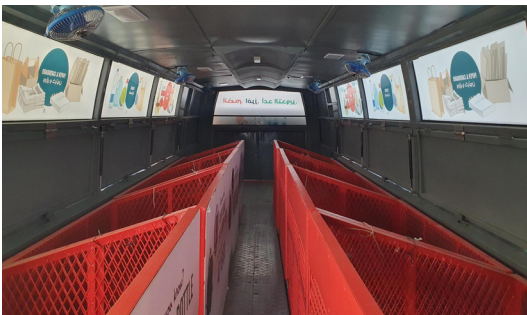

Over 1,100 bespoke bins, made of grade 304 stainless steel. The pattern of Expo 2020 logo has been cut out through laser cutting technique, and three different streams have been branded through distinct colors to ease the waste segregation process for the users.

3 | Recycling Bus

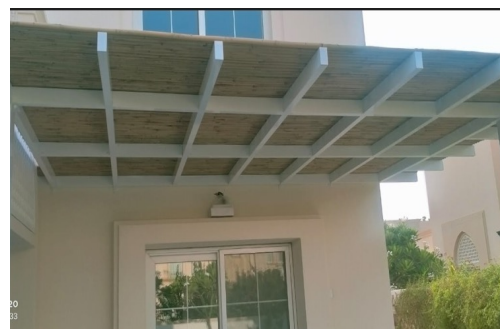

Worn out passenger bus refurbished and modified into a recycling collection bus.

This concept was made to raise awareness about the importance of correct waste disposal, and to help turn refuse into reusable items. This bus goes around communities and schools in Dubai to familiarise residents to recycling and create a sorting culture.

4 | Villa and Communities Engineering Services

Some of the work done around communities includes the installation of pergolas using the customer's choice of material, installation of all types of fencing, and any kind of fabrication job like outdoor furniture and park equipment.

THE NEW OLD & RELOVED

Born out of love and care for our environment, "The New Old & Reloved" is an Emirati brand established as by-product of a recycling meets innovation approach, giving waste a new lifecycle, a chance to be owned and loved once again.

From the scrapyards to the front yards, our products go through a transformation journey from simply being waste materials to becoming modern industrial furniture that everyone would love to own.
